Since 1978 we've been dedicated to creating kits for people who love to build. From our early vac-formed aircraft kits to our exquisite resin and metal race car kits of today, our goal has always been to provide you with models that are engineered to be a pleasure to build, and an even greater joy to display.

The models you see here are all hand-cast to the highest standards of quality, in high strength urethane, and all come complete with full color decals and metal etched parts. No other kits are needed to finish them. For the Fisher dealer nearest you, or to order direct, please visit our web site, or call the number below.

Thanks for 23 years of support.  
Paul & Susy Fisher
